

Dear FCC commissioner,

I am a listener and subscriber to XM satellite radio. As a major traveler on the road, I benefit greatly from the music and weather and traffic channels I pay for these premium channels and desire this quality radio over anything available on the FCC network.

I would urge you to REJECT the NAB's petition 04-160 and support XM's ability to provide the type of programming I desire.

Thank You.

Jim Corcovelos
